

What frustrates us about social workers

Don't listen

When they don't understand why we act up or do what we do for a reason

I don't like it when they don't listen to your feelings

When they take you out of lesson and bring attention to you

Social workers that don't understand

Don't allow you to speak

I don't always like talking about bad things or things to do with adoption

Make it awkward

When they leave just after you have built trust in them and then you have to start all over again

Getting on your back all the time

I don't see my social worker enough

When I'm not ready

Force you to say things

When they treat you differently

I don't like it when they write things down that you are saying and then show it to other people.

School - need to be aware

We need more social workers

People need to know more about adopters

Need to use ATID website as a resource

Either too many social workers or not enough
